WARRANTY

Dayliter skylights are carefully crafted with quality materials to ensure a leak-free product. With proper installation, care and maintenance we are confident that our skylights will outlast our 10-year warranty.

10 YEARS

For failure of skylight materials causing the skylight to leak.

RESIDENTIAL & COMMERCIAL SKYLIGHTS, ROOF DOORS AND AWNINGS

Dayliter designs and manufactures quality skylights, roof doors and awnings. Each is comprised of clean lines, quality materials and excellent after-market support to ensure satisfaction. Whether you purchase a skylight for the benefits of natural light, a roof door for easy access to your roof or an awning for protection from rain and snow, Dayliter is the choice for you.

quality

Dayliter products are specially designed and manufactured with quality materials so that you can enjoy the benefits of natural light for a lifetime. Our commitment to excellence allows us to provide you with a 10-year warranty against leakage.

style

Dayliter Skylights provides you with all the benefits of natural light and come with many options for every style and need. Choose from fixed or venting styles. All Dayliter Skylights can be easily installed and are available in standard and custom glass sizes as well as various acrylic shapes, sizes, glazing combinations and colors.

function

Ventilating a building through an opening skylight releases the hot air that naturally accumulates near the ceiling. Although ideal for bathrooms, kitchens and attics, they can be installed in any room and operated with a Truth™ hand crank, pole or electrical opener. Roof doors provide convenient access to your roof deck, along with additional natural light. And our awnings keep entrances free from rain and snow.

Residential & Commercial

Dayliter Skylights can be used in **Residential, Institutional, Industrial and Commercial applications.**

Dayliter features a variety of styles

Dayliter manufactures external and internal curb mount skylights. Skylights provide excellent natural lighting that beautify indoor spaces by providing warmth and brightness. Natural lighting is healthy, energy efficient and can significantly reduce your peak electric loads. Skylights can also be used to help ventilate your home or building.

VCM - INTERNAL MOUNT DOME

Roof Doors

Roof Doors allow you to access and take advantage of usable roof space and provide you with additional natural lighting. They are available in three standard sizes.

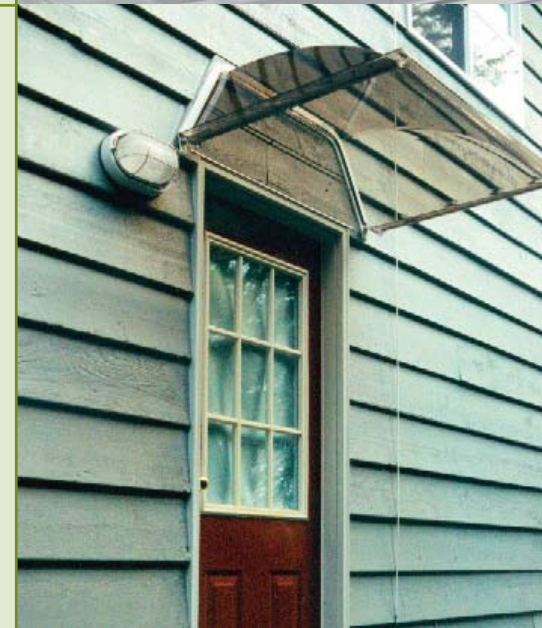

- one piece aluminum frame with lift handle
- stainless steel fasteners and inside lockable and adjustable latch
- triple hollow frost-free frame
- Available in white or black exterior finish

Awnings

Awnings provide protection from rain and snow as well as shade and UV protection for doors and windows. They are easy and quick to install and remove.

- molded gutters on three sides
- for double entry doors, install side-by-side with joining strip
- smoke gray acrylic
- 45" w x 34" d x 16" h

Acrylic & Glass Skylight Insulite, The Ultimate Skylight

The Insulite skylight was developed by Dayliter for harsh weather conditions. It has the highest insulating value of any skylight on the market today. The sealed unit consists of a PVC mainframe and it can be enhanced with a number of energy efficient glazing options. The acrylic shape is installed over the glass unit, providing greater insulation and sound-proofing and makes the skylight suitable for either sloped or flat roof curb installations.
