Sentry II®

The Next Generation Of Power Window
And Skylight Operating Systems.

PERFORMANCE AND COMPATIBILITY

Sentry II HS for heavy skylights and Sentry II WLS for windows and light skylights are based on the powerful and reliable mechanics from our previous motorized systems. But, now we've added a new digital electronics package with built-in power conversion to make skylight and window automation more appealing and even easier to achieve.

Individual power units drive existing window hardware in place of the hand crank—so you'll have an easy, automatic system to control your windows and skylights. Now closing and locking will all be at the touch of a button. Plus, you can choose between a wall switch or hand-held remote—and Sentry II HS and Sentry II WLS even work with security, HVAC, or home automation systems.

**Multi-Function Remote Control Operates
Windows, Skylights And Blinds.**

MOTOR SYSTEMS FEATURES & BENEFITS:

1. Direct 110 VAC hookup
 - Easy to install
 - Eliminates the need to hide transformer and wiring
2. Remote control
 - No wall switch required, remote controls both window and skylight motors and powered blinds
3. Built-in thermostat (in remote)
 - Helps to maintain a comfortable environment inside the home
 - Allows for true "chimney effect" ventilation since both windows and skylights react to same control
4. Built-in blind control
 - Eliminates the need for separate blind controls
 - Compatible with most 12 VDC blind systems
5. Rain sensor is standard for each unit
 - Protects the home from weather damage and allows each window to respond independently
 - Corrosion resistant sensor decreases maintenance and cleaning requirements and extends service life

FEATURES & BENEFITS (cont.):

6. Inputs for accessories
 - Compatible with home automation systems, smoke detectors, and security systems
7. Contemporary style wall control plate
 - Complements existing home décor
8. Synchronous motor option
 - Allows multiple motor installations for monumental skylights with lid weights up to 400 lbs.
9. System settings retained and protected
 - Memory is secure even in power outages

MORE PEACE OF MIND, AND SECURITY!

Now at home or away, Mother Nature won't surprise you. You don't have to keep your eye on the weather when built-in sensors do all the watching for you. Plus, your windows can be programmed to close and lock before security systems are activated. We've thought of everything for you. So when it comes to your next skylight and window project, ask for Truth's Sentry II Motorization Systems—and let us help you put automation at your fingertips.
